

APPLICATION FOR AN ELECTRICITY GENERATION
LICENCE IN TERMS OF THE ELECTRICITY REGULATION
ACT, 2006 (ACT NO. 4 OF 2006).

Please return completed form to the email address below:

GxLicenseApplications@nersa.org.za

Applications that are not sent to this email address will not be accepted by NERSA.

SECTION A

A1 Sivar	Full name of applicant (business name) and business registration number and Solar Power Plant (RF) (Pty) Ltd; Reg No: 2019/573601/07
)	
A2	Address of applicant, or in the case of a body corporate, the registered head office
Physic	cal address
20th 3 8001	Floor, Portside Building, 5 Buitengracht Street, Cape Town, Western Cape
	address Floor, Portside Building, 5 Buitengracht Street, Cape Town, Western Cape, 8001
A3	Telephone number of applicant
(021)	202 1230
A4	Fax number of applicant
(N/a)	

PARTICULARS OF APPLICANT

A6 Contact person

A.5

First name Adam

Surname <u>Treki</u>

Telephone No +27 83 785 2279

adam.treki@scatec.com

Mobile No <u>+27 83 785 2279</u>

Fax No. N/A

Email address <u>adam.treki@scatec.com</u>

Email address of applicant

A7 Legal form of applicant

Sivanda Solar Power Plant (RF) (Pty) Ltd; Reg No: 2019/573601/07

Note to Section A

1) State whether the applicant is a local government body, a juristic person established in terms of an act of parliament, a department of state, a company or other legal body.

Private Company

2) If the applicant is a local government body, attach a copy of the proclamation establishing such body. Where the applicant is a company, the full names of the current directors and the company registration number are required.

Siyanda Solar Power Plant (RF) (Ptv) Ltd Directors: Adam Christopher Salem Treki Mohamed Khalpe Company Registration No.:

2019/573601/07

Also provide shareholding information of the company.

| STANDER Scheme State English State English

The project company is an incorporated special purpose vehicle (SPV) namely, Siyanda Solar Power Plant (RF) (Pty) Ltd. The shareholders of the project company are Scatec Solar Netherlands B.V (50.9%), Greenstreet 1 (Pty) Ltd & Redstreet 1 (RF) (Pty) Ltd (Greenstreet & Redsteert SPV to be Incorporated) (46.5%) and a SPV that is to be incorporated by the Local Community Trust (LCT) (2.6%) which will be established and through which the the LCT will hold shares in the SPV.

Also refer to Annexure 9 as confirmation of the directors of the Siyanda SPV.

SECTION B COMMENCEMENT DATE OF LICENCE

B1 Desired date from which the licence (if granted) is to take effect

<u>Construction period: 01 December 2025 - 30 August 2027 (Up to 21 months construction)</u>

Note to Section B

- 4) The normal processing time for a licence application is 120 days once all relevant information has been provided and there are no objections received.
- 5) If the applicant intends operating more than one generation station under the proposed licence, please complete separate application forms for each generation station.

SECTION C PARTICULARS OF PROPOSED GENERATION STATION

coordinates (x ⁰ xx'xxx	on of generation station (please attach maps) and GPS $x'' S, y^0 y y' y y y'' E$
26°59'51.61"S, 26°43	
Address of generation	station

Planned Capacity (nameplate rating)

240MWac (Contracted Capacity); and 288MWdc (Installed Capacity)

Maximum generation capacity (MW) expected to be available from the generation station and energy to be produced (MWh) over the next 5 years of operation. These estimates should be based on modelling of how the power station will fit into the demand profile of its customers, taking into account the least cost energy purchase consideration and demand management options of customers. The total annual energy produced for the life span of the project will also be included in full in the excel financial model.

YEAR	Max MW	Charging MWh from the grid	Own use MWh	Export (Sales) MWh
2027	240	705203.7	3200	705203.7
2028	240	703462.7	3200	703462.7
2029	240	701704.2	3200	701704.2
2030	240	699918.8	3200	699918.8
2031	240	698102.5	3200	698102.5
2032	240	696260.6	3200	696260.6

C9 State and explain the availability factor and round-trip efficiency (for energy storage systems only).

Capacity Factor: 27.9%

Year	Round Trip Efficiency (%)
N/a	N/a

C10 Expected future life of the generation station including any planned battery augmentation.

20 Years (PPA Term)

Summary of technical details of the facility including equipment to be used, e.g. batteries, investors, transformers, charge cycles per year, hours of operation at contracted capacity etc.

Refer to b	oelow not	e and an	inexures.
------------	-----------	----------	-----------

Ancill	ary se	rvice	s tha	t will	be	provide	d by	the	facili	ty
]	Refer	to be	low	note	and	annexu	es_		_	

Note to Section C

Also provide additional technical information of the project as separate attachments. This should give the technology used, technical feasibility studies e.g. radiation studies for Solar projects or wind studies for Wind projects, connection to the grid arrangements, single line diagrams of the network connection as well as single line diagrams of the generation station, etc. Also attach fuel supply/wheeling/ connection consents/ agreements where applicable (if you are going to use someone else's network).

This information is also used as technical inputs to the financial model of the project, e.g. solar radiation studies will determine the amount of power that can be generated.

The Project is a 240MWac/288MWp Solar Photovoltaic (PV) facility that will interconnect with the national grid via Eskom's existing Mercury Main Transmission Substation (MTS).

Please find attached in Annexure 1 which includes:

- 1. Network Connection SLD;
- 2. Concept Layout; and
- 3. Forecast Energy Sales Independent Review

SECTION D PARTICULARS OF LONG-TERM ARRANGEMENTS WITH PRIMARY ENERGY SUPPLIERS

Name of primary energy supplier/s (mining house, colliery or other fuel suppli if applicable. For BESS, state the supplier of charging power and the agreed tar for charging energy. N/a							
Particulars applicableN/a	of the	contractual	arrangements	with	primary	energy	supplie
2							

Notes to Section D

6) Please provide brief particulars of any long-term agreements entered into with fuel suppliers and copies of such contracts (Signed Fuel Supply Agreements).

N/a

SECTION E MAINTENANCE PROGRAMMES AND DECOMMISSIONING COSTS

- E1 Details of any proposed operation and maintenance programmes, including the expected cost and duration thereof, covering the lifespan of the project. Project proposals to state the expected availability, planned outage rate and forced outage rate of the plant over the life span of the project. Additional information may be provided as an attachment.
 - O&M Duration 20 years
 - The O&M fee for the first year in ZAR is and accumulates annually over the O&M duration.
 - O&M Operations contractor is Scatec Renewable Operations (Ptv) Ltd.
 An entity wholly owned by Scatec Solar Netherlands B.V.
- Details of any major decommissioning costs expected during the life span of the power station and provided for in the project feasibility study.
 - Decommissioning costs will be made available after the execution of the PPA through a decommissioning trust/guarantee.
 - The Project commissioned a 3rd party Decommissioning Cost Letter (Attached as Annexure 2) by a certified expert which was incorporated in the business case of the Project.
- E3 Details of major generation station expansion and modifications planned for in the feasibility study (Dates, Costs in Rands (state year) and description)

 N/A

SECTION F CUSTOMER PROFILE

Particulars of the person or persons to whom the applicant is providing or intends to provide electricity from the generation station. Explain relationship between buyer and seller if any. Please attach the signed Power Purchase Agreement.

ESKOM Holdings SOC Limited.

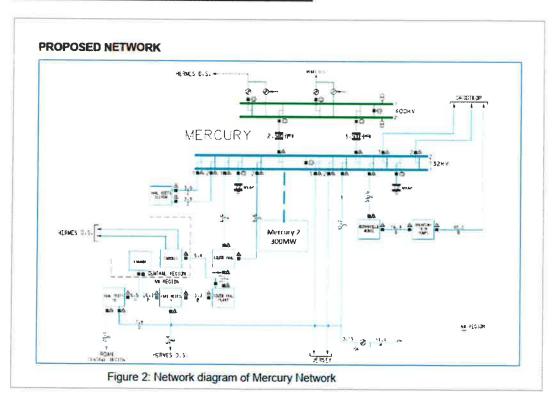

Please find attached the PPA Draft (issued as part of the REIPPPP BW7 RFP) attached as Annexure 3.

F2 Network connection details (connection points, voltages, wheeling arrangement, single line diagram). Please attach connection cost estimate letters and / connection consents if not owner of the network.

The Cost Estimate Letter (CEL) which includes the Single Line Diagram (SLD) is attached as part of Annexure 1.

The Connection Point is a New Point at the Eskom Switching Station to be established on the project site.

From the point of connection at the onsite the Eskom Switching Station a 132 kV overhead line will connect to Mercury MTS.

Paste very high-level network connection single line diagram on this form.

Provide summary details of Power Purchase Agreements with customer including PPA Term, PPA Tariff for Energy, Capacity Payments, Ancillary Payments etc. (Please attach Power Purchase Agreements and all return schedules as per the PPA).

The Project will enter into a 20-year PPA with Eskom. The tariff is on a takeor-pay basis and is adjusted annually for South African CPI. The Tariff is R486.86 ZAR/MWh (Fully indexed).

SECTION G FINANCIAL INFORMATION

G1 Submit projections of and current statements of the accounts in respect of the undertaking carried on by the applicant, showing the financial state of affairs of the most recent period, together with copies of the latest audited annual accounts where such have been prepared if the project is corporate financed (as a separate attachment). If the project is new and is Project Financed, attach the financial model that show project viability (as a separate attachment, see G2 below).

Scatec has a proven track record of closing projects in South Africa and internationally. We have successfully raised equity for the R1, R2, R4, R5 REIPPP projects as well as for the RMIPPP and ESIPPPP BW1 projects in South Africa. Please refer to our website Asset portfolio overview - Scatec for more information.

Whether the project is Corporate or Project financed, submit the financial model in excel format of the proposed generation facility for the lifespan of the project, showing the funding (Equity/ Debt ratios) and their cost, cost of the project, sales and revenues generated by the project, stating the assumptions underlying the figures. A separate write up must be provided to explain the financial information on the model.

The project is project financed and has the below key metrics. Note these inputs and assumptions are as per the bid submission model and are subject to change if timelines and processes change.

Debt / equity ratio :	debt.	equity
COD c.		
COE c.		
Total project cost		
Revenue generated by	the project	

Assumptions underlying the figures IPPO has given a set of assumptions to use – please see Appendix R8 as per the RFP documentation given to bidders.

Give a summary of the project financing at high level on this form (not more than a page) stating who will finance the project, how is funding split between debt and equity, and what is the terms and conditions of the funding agreements (cost of debt and equity etc). In addition, also fill in table below:

Standard Bank of South Africa is the Mandated Lead Arranger and will provide the debt funding of total project cost.

Scatec Netherlands BV (50.9%) and Redstreet and Greenstreet (SPV to be incorporated) (46.5%) whilst Scatec ASA will provide the equity for the local community trust (2.6%).

The funding agreements are drafted in a typical project finance ring fenced structure.

Total capital cost of the project (including IDC)	
Interest During Construction (IDC)	
Post tax real IRR (for the whole project)	
Nominal IRR after Tax (for the whole project)	
Debt/Equity Ratio	
Payback period	

Notes to Section G

- The financial projections should be based on a production plan for the generation station and the revenue generated by participating in the electricity market and by bilateral contracts (Power Purchase Agreements) with customers. Reference to the latest version of National Integrated Resource Plan (IRP) is required to demonstrate that the proposed power purchase agreement is the least cost solution available to the electricity purchaser.
 - 8) Evidence of compliance with the Integrated Resource Plan (IRP). If the proposed plant in not in the IRP, the applicant must obtain Ministerial approval for deviation from the IRP in accordance with Section 10(2)g of the Electricity Regulation Act, 2006 (Act No. 4 of 2006). This approval is granted by the Minister of Energy so applicant must contact the Department of Energy for this approval. The DDG: Policy would be the contact person at DoE. Sometimes the Minister gives a blanket approval, and applicants are encouraged to contact NERSA for the latest update on what is exempted.

5. Determination of New Generation Capacity Required

- 5.1 The Minister issued the Second and Third determinations in terms of section 34 of the Electricity Regulation Act, for the new generation capacity that is required to ensure the continued uninterrupted supply of electricity.
- 5.2 The Minister indicated in the Second Determination that new generation capacity from renewable energy is necessary, in the following terms:

6800 megawatts (MW) should be procured to be generated from renewable energy sources (PV and Wind), which represents the capacity allocated under the headings "PV" and "Wind", for the years 2022 to 2024, in Table 5 of the Integrated Resource Plan for Electricity 2019 - 2030 (published as GN 1360 of 18 October 2019 in Government Gazette No. 42784)("IRP 2019");

- 5,3 More recently, the Minister indicated in the Third Determination that new generation capacity from renewable energy is necessary, in the following terms:
 - 1. Ihat new generation capacity is needed to be procured to contribute towards energy security, accordingly, 14 771 megawatts (MW) should be procured to be generated from Renewable Energy and Energy Storage sources as described in paragraph 2 below, which is in accordance with the capacity allocated to those energy sources, under the headings "Storage"; 'PV" and "Wind", for the years 2024 to 2030, in Table 5 of the Integrated Resource Plan for Electricity 2019 2030 (published as GN 1360 of 18 October 2019 in Government Gazette No. 42784)("IRP 2019");
 - 2. the new generation capacity determined to be necessary as per paragraph 1 above ("the new generation capacity") shall be generated in accordance with following MW allocation per technology::
 - a. Solar PV 3940 MW:
 - b. Wind 9600 MW; and
 - c. Energy Storage 1231 MW
- The allocation to renewable energy in the Second Determination and the Third Determination is broadly in accordance with the capacity allocated to Renewable Energy generation in IRP 2019.
- 5.5 The Government has conducted, or is intending to conduct in the future, various procurement processes in order to satisfy the Renewable Energy requirements of South Africa, including this REIPP Procurement Programme, and any other procurement programme as determined by the Government.

Source: REIPPPP BW7 RFP - Part A - General Requirements, Rules and Provisions

The Project was awarded Preferred Bidder Status under the Ministry of Mineral Resources and Energy's request for new generation capacity under seventh bid submission phase (BW7) of the REIPP Procurement Programme and therefore is in compliance with the applicable regulation acts.

HUMAN RESOURCES INFORMATION

Submit details of the number of staff and employees and their designation (not names, e.g. three professional engineers registered with ECSA, two clerks etc) in the service of the applicant at the generation station and in any support services separate from the generation station. Also provide information regarding relevant qualifications and experience in critical areas e.g. Professional registration (Engineering Council of South Africa – ECSA), Government Certificate of Competency. This information is based on employment plan of the company and there is therefore no need to attach people's CVs since its understood that people will be hired when project is about to be operationalised.

The number of jobs to be created during construction and operation should also be clearly stated. It would also be important to state whether the jobs will be locally sourced or not, at each level, e.g. at management level, professional level, skilled level and unskilled level.

Human Resources should comply with BBEEE policy or the requirements of the Request for Proposal (RfP) documents if the project is as a result of a tendering procurement process, e.g. the DMRE Renewable Energy Independent Power Producer Procurement (REIPPP) process. The applicant should give the number of employees that will be employed during project construction, operation and maintenance.

All this information should be submitted as an attachment.

Refer to Annexure 6 - Human Resources Information.

The attached annexures provide details of the project employment plan. This is broken down to detail the following aspects of employment:

- > The Project activities the planned positions will cover.
- > The Job designation of each employee.
- > The jobs to be created during construction and operations.

A total of 206 people will be employed over the project term, with 166 envisioned during construction, and 40 over the operation & maintenance period. Construction is anticipated to last for 12 months, while the Power Purchase Agreement accounts for 20 years of operation and maintenance activities.

Below is an indication of projected "total jobs created", expressed as people months and broken down to the committed demographic targets.

"Person Month" means a total of one hundred and sixty (160) hours worked by an Employee.

	Construction Period		Operations Per		
lob Crestion	Value (Person Months)	ж	Value (Person Months)	%	Combined Performance
Total RSA Based Employees during the Measurement Period	1.389		5,481		
RSA Based Employees who are Citizens during theMeasurement Period	1.336	96.18%	5,259	95.95%	96.0%
RSA Bases Employees who are Black People during the Measurement Period	867	62.44%	4,010	73.17%	71.0%
RSA Based Skilled Employees during the Measurement Period	428	V4.7775	3,753	-744779	ATOM
RSA Based Skilled Employees who are Black People during the Measurement Period	115	26.91%		42.61%	41.0%
RSA Based Skilled Employees who are Black People with specialised skills during the Measurement Period	10	2.34%	1.285	34.24%	31.0%
RSA Based Employees who are Citizens who reside in Local Communities during the Measurement Period	410	29.54%	2,338	42.65%	40.0%
RSA Based Employees who are Black Youth aged 15 to 35 years during the Measurement Period	660	47.56%	731.0.04	50.62%	50.0%
RSA Based Employees who are Black Women during the Measurement Period	202	14.54%		33.92%	
RSA Based Employees who are People with Disabilities during the Measurement Period	97	7.00%	384	7.00%	30.0% 7.0%

The stipulated employment plan is aligned to the requirements of the Request for Proposal (RfP) submitted through the DMRE – Renewable Energy IPP Procurement Programme process.

SECTION I PERMISSION FROM OTHER GOVERNMENT DEPARTMENTS OR REGULATORY AUTHORITIES

I. What progress has been made to obtain the required permits and approvals for the generation project? Please provide copies of permits issued in respect of the operation of the generation station such as Environmental Authorisations, Water Use Licence, Civil Aviation Authority Approval, etc. (this is depended on technology used).

Permit	Status				
Environmental	Secured, EA approved October 2021 and				
Authorisations (EAs)	October 2023. Validity period 10 years.				
Water Use Licence (WUL)	Confirmed not required as it falls within the				
	ambit of a General Authorisation (GA). GA's				
	obtained in February, March and September				
	2023.				
Civil Aviation Authority	ity Conditionally Approved January 2022 for a				
Approval (CAA)	period of 5 years.				
Cost Estimate Letter (CEL)	Secured, Approved August 2023.				
Subdivision of Agricultural					
Land Act (SALA)	approval granted for a period of 5 years.				
DMRE MPRDA Section 53	Secured, approved by the DMRE on June 2022,				
	August 2022 and February 2023.				

The corresponding permits are in the attached Annexure 7.

Please note that the development structure of Mercury Solar PV 2 consists of 3x adjacent PV facilities that was combined to form a 240MW facility for REIPPP BW7. Some permits are therefore in the name of the SPV known as Paleso Solar Power Plant (RF) Pty Ltd and is in the process of being combined with the Siyanda Solar Power Plant facility to have the required permits issued to the applicable SPV. Between the SPV's the assessed area has not changed and therefore permits have been issued and it is a formality to have all the permits ringfenced to the ultimate responsible SPV.

SECTION J BROAD-BASED BLACK ECONOMIC EMPOWERMENT

Please provide information in terms of the following categories:

COMPONENTS	POINTS	0.5	0.75	1
Direct	Black Ownership	10% to <20%	20% to 50%	>50%
Empowerment	Black Management	20% to <35%	35% to 50%	>50%
	Black Female Management	1% to <5%	5% to 10%	>10%
	Black Skilled Personnel as % of payroll	20% to <35%	35% to 50%	>50%
Human Resource Development	Skills Development Programs as % of payroll	1% to <5%	5% to 10%	>10%
Bevelopment	Employment Equity i.e. Women Representation	20% to <35%	35% to 50%	>50%
	Procurement from Black/BEE Suppliers	20% to <35%	35% to 50%	>50%
Indirect Empowerment	Enterprise Development i.e. Monetary Investment or quantifiable non-monetary support in SMME with BEE contributions as % of Net Asset Value/ EBITDA/Total Procurement	10% to <20%	20% to 25%	>25 %
	Industry specific initiatives to facilitate the inclusion of black people in the sector as % of net profit	1% to <5%	5% to 10%	>10%
NERSA's Discretionary Points	Based on skills transfer and fulfilment or acceleration of other national objectives e.g. employment of disabled personnel robust implementation of mechanisms to verify the BEE status of suppliers reported under preferential procurement and utilization of DTI approved accreditation agencies and so on.	1% to <5%	5% to 10%	>10%

A copy of Appendix 1C of the bid submission is attached herewith as Annexure 6, with confirmations of the commitments to components in the table above.

In addition, the following commitments are made towards the Human Resource Development components:

1. Black Skilled Personnel as % of payroll – 41%

The number of black skilled personnel are anticipated to cover 41% of the payroll cost over the project term.

2. Skills Development Programs as % of payroll - 3.50%

The Rand value of committed Skills Development obligations is 3.52% of the anticipated payroll costs over the project term.

A differentiation is provided for the different type of skills development activities to be undertaken with indicative percentages committed expressed as a percentage (%) of Revenue:

- > 0.05% towards skills development contributions spend to citizens on learning programmes specified in the learning programme matrix during the operating measurement period.
- > 0.05% skills development contributions spend on bursaries for black students at higher education institutions during the operating measurement period.
- > 0.005% skills development contributions spend to black disabled employees on learning programmes specified in the learning programme matrix during the operating measurement period.

SECTION K ECONOMIC INFORMATION

Please state the economic benefits of the project to the local community and to South Africa as a whole. If there are Economic Development Commitments made, they must be stated here or be provided as attachments if the files are big, but in such cases, there should be a brief summary.

The project has made commitments towards Economic Development for both the local community and South Africa at large. The following elements of development are committed to over the Construction and Operations phase:

- 1. Job Creation.
- 2. <u>Local Content:</u> commitments have been made to utilise South African products in the construction, operation and maintenance of the Project as part of undertaking. These products relate to the utilisation of raw materials, manufactured parts and components, utilities, and services. The commitments are detailed in the table below:

Local Content	200-SR-01 Local Content Spend during the Construction Weasurement Period	Value of Local Content Spend during the Construction Measurement Penod * 100 / Total Project Value in the Construction Measurement Penod	41.00%
	200-SR-02 Local Content Spend during the Operating Measurement Penod	Value of Local Content Spend during the Operating Measurement Period * 100 / Total Project Value in the Operating Measurement Period	41 00%

3. A diverse <u>management teams</u> with South African specific demographic considerations. Through the equity structure and the resultant voting rights of shareholders, a commitment is made to ensure that Black People (including Black Women) can meaningfully contribute to the strategic direction and decision making of the Project Company and its Material Contractors. The commitments are detailed in the table below:

Management Control	400-SR-01 Black People who are Board Directors	Black People who are Board Directors * 100 / All people who are Board Directors	50.00%
	400-SR-02 Black People in Executive Management	Black People who are Executive Managers * 100/ All people who are Executive Managers	46 61%
	400-SR-03 Black People in Senior Management	Black People who are Senior Managers * 100/ All people who are Senior Managers	58 74%
	400-SR-04 Black Women who are Board Directors	Black Women who are Board Directors * 100 / All people who are Board Directors	25,00%
	400-SR-05 Black Women in Executive Management	Black Women who are Executive Managers * 100/ All people who are Executive Managers	23 40%
	400-SR-06 Black Women in Senior Management	Black Women who are Senior Managers * 100/ All people who are Senior Managers	15.38%

4. Monetary commitment to Skills Development - a commitment to invest in the development and empowerment of the South African workforce through various skill building initiatives. The goal is to enhance the lives of workers, address skills shortages, and promote equal opportunities for previously disenfranchised citizens. The commitments are detailed in the table below:

Skilla Development	500-SR-01 Skills Development Contributions	Skills Development Contributions * 160 / Revenue in the Operating Measurement Period	0.05%
	500-SR-02 Bursaries for Black Students at Higher Education Institutions	Bursaries for Black Students at Higher Education Institutions 100 / Revenue in the Operating Measurement Period	0.05%
	500-SR-03 Skills Development Contribution towards Black Disabled Employees	Skills Development Contribution towards Black Disabled Employees * 100 / Revenue in the Operating Measurement Period	0.005%

5. Monetary commitment to <u>Enterprise and Supplier Development</u>. Details of the commitments are provided in the table below:

Enterprise and	Profesential procurement		
Suppiler Development	600-SR-01 B-BBEE Procurement	B-BBEE Procurement Spend * 100 / Total Measured Procurement Spend	71 00%
	600-SR-02 Black Enterprise Procurement	Procurement spend on Black Enterprises * 100 / Total Measured Procurement Spend	31 00%
	600-SR-03 & BBEE Procurement Spend on QSEs and EMEs	B-BBEE Procurement Spend on QSEs and EMEs * 100 / Total Measured Procurement Spend	25 00%
	600-SR-(4 B-8BEE Procurement Spend on Black Women Owned Vendors	B-88EE Procurement Spend on Black Warner Owned Vendors * 100 / Total Measured Procurement Spend	13 00%
	Supplier development		
	600-SR-05 Supplier Development Contributions during the Construction Measurement Period	Supplier Development Contributions during the Construction Measurement Period 100 / Total Project Value in the Construction Measurement Period	0.10%
	600-SR-06 Supplier Development Contributions during the Operating Measurement Period	Supplier Development Contributions during the Operating Measurement Period * 100 / Total Project Value in the Operating Measurement Period	0.10%
	Enterprise development		
	600-SR-07 Enterprise Development Contributions.	Adjusted Enterprise Development Contributions * 100 / Revenue in the Operating Measurement Period	0.80%
		the Operating Measurement Penod	

6. Monetary commitment to <u>Socio-Economic Development</u> in the local community. The objective is to support a wide range of initiatives that contribute to the overall advancement of these communities. This includes, but is not limited to, projects focused on education, healthcare, and social welfare, as well as infrastructure development and reconstruction in underdeveloped areas.

The project commits to actively contributing to these initiatives, working hand-in-hand with the Local Communities to make a positive and lasting impact on the lives of individuals residing in these communities. Details of the commitments are provided in the table below:

Socio-Economic 700-SR-01 Socio-Economic Development Contributions	Adjusted Socio-Economic Development Contributions * 100 /	1 40%
Development	Revenue in the Operating Measurement Period	

7. Ownership – the project has committed to facilitating ownership in the Project Company and Material Contractors by Citizens, especially Black People, Black Women and Local Communities.

The extend of ownership is provided in the table below:

Ownership	300 PC-01 Not Used	Not Used	IVA
	300 PC-02 Sharobolding by Black People in the Seller	Shareholding by Black People in the Seller * 100 / Total Shareholding in the Seller	25 85%
	300-PC-03 Shareholding by Local Communities in the Seller	Shareholding by Local Communities in the Seller * 100 / Total Shareholding in the Seller	2 60%
	300-PC-04 Shareholding by Black Women in the Selfer	Shareholding by Black Women in the Seller * 100 / of Total Shareholding in the Seller	12 04%
	300-CC-01 Shareholding by Black People in the Construction Contractor	Shareholding by Black People in the Construction Contractor * 100 / Total Shareholding in the Construction Contractor	25 00%
	300-OM-01 Shareholding by Black People in the Operations Cuntractor	Shareholding by Black People in the Operations Contractor * 100 / Total Shareholding in the Operations Contractor	0 00%
	300-CC-02 Shareholding by Black Women in the Construction Contractor	Shareholding by Black Women in the Construction Contractor * 100 / Total Shareholding in the Construction Contractor	12 40%
